## Sydney's Growth Centres

Within the South West Growth Centre, the Minister has announced new land release to accommodate housing with 3,000 homes at Catherine Fields.

Release of land at Leppington and East Leppington precincts are aiming to provide an additional 11,000 new homes.

Other precincts on public exhibition include the Schofields Precinct, Box Hill and the Austral Precinct.

These growth centres will be supported by infrastructure such as the North West Rail Link, town centres, schools, business and leisure opportunities where close to 500,000 people will live over the next 30 years.

HIA supports any action aimed at delivering more housing for NSW, however time frames to realise the new housing are the critical issue.

We will be following these developments closely and advocating for timely implementation.
